## Handheld Spectrum Analyzer

# SpecMini Handheld Spectrum Analyzer

## Overview

SpecMini is the first Android hand-held spectrum analyzer. It features high testing sensitivity, light weight, compact size and portable design. Android operating system and high-resolution touch screen allow testing and measurement can be performed user-friendly. With excellent performance, SpecMini meets the testing and measurement requirements of the majority of RF signals.

## Key Facts

- Frequency Range: 9kHz to 6.0GHz
- DANL: -168dBm@1GHz (Sensitivity set to High, normalized to 1Hz)
- RBW: 10Hz to 5MHz
- Multi-screen: maximum 4 windows
- Android Operating System: touch screen operation, multi-touch, easy-to-use
- Compact size (197mm×93mm×61mm) and light weight (0.9kg, including the battery)
- More than 5 hours operating time
- Support interference signal hunting with AoA algorithm. Map service provided by "OpenStreetMap"
- Working as drive test scanner for propagation model tuning. Support a maximum 40km/h driving speed.

# Functions & Applications

## Spectrum Analysis

### Swept-tuned Spectrum Analysis

The swept-tuned spectrum analyzer analyzes the stable and cyclically varying signals and provides signal amplitude and frequency information.

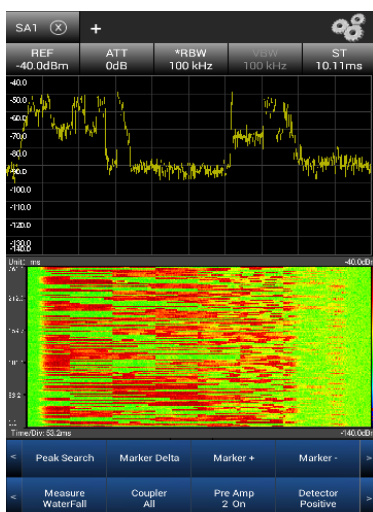

### Zero Span

As an instrument for frequency domain measurements, SpecMini can perform time domain measurements in zero span mode.

### Waterfall Display

SpecMini provide Waterfall display (also called spectrogram). This function allows user to check spectrum in both frequency and time domain. User can easily find aperiodic target signal in waterfall display.

### High Sensitivity

SpecMini provide superior DANL as low as -168 dBm/Hz, promising a 10 to 20 dB better performance compare with other handheld spectrum analyzer.

## Wireless Communication Testing

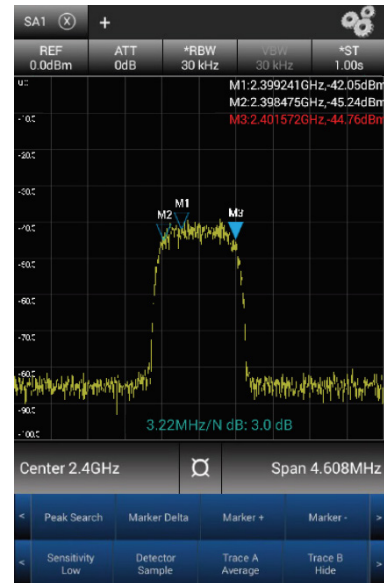

### Occupied Bandwidth(OBW)

With SpecMini OBW measurement function in, Engineers can easily measure signal channel bandwidth which include its 99% power (ratio could be adjusted).

### NdB Bandwidth

With SpecMini NdB bandwidth measurement function, instrument can test target signal's NdB bandwidth automatically.

### Channel Power

Channel power refers to the power and power spectral density within a particular channel bandwidth. SpecMini can automatically test the channel power of a given bandwidth.

### Adjacent Channel Power Ratio (ACPR)

Adjacent channel power ratio(ACPR) measurements help check for signal leakage, identify and control sources of interference. SpecMini provides automated adjacent channel power ratio measurement.

## RF Field Test

### Propagation Model Tuning

The SpecMini has a built-in GPS module for stamping latitude and longitude info on spectrum results. Test result with GPS stamp can be stored as screenshots. It is convenient for engineers to match test data and test sites. Also SpecMini can output .csv file which include signal power and GPS info for the after analysis of propagation model tuning. That is to say, SpecMini can works like a CW drive test scanner. With its powerful Android platform and superior measurement speed, user can drive as fast as 40km/h when doing drive test.

### Transmission System Set up and Maintenance

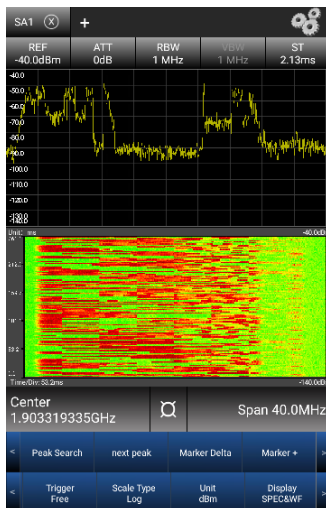

When using for transmission system set up and maintenance, SpecMini can provide:

1. Evaluate signal quality with spectrum analysis
2. Spectrum analysis for mainstream mobile network signal
3. Perform cable test and wireless test for transmission system

### Frequency Check

Frequency check is to test the expected frequency band and estimate the interference of the frequency band before building the wireless network coverage. Spectrum measurement with SpecMini is a means of frequency check. Its spectrum results determines the interference frequency and bandwidth; Waterfall display determines the time characteristics of the interference signal.

# Innovative Features

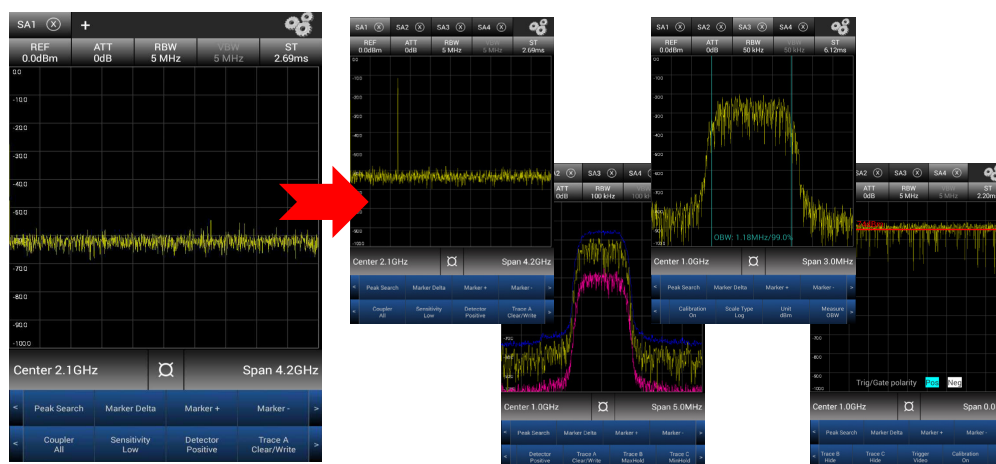

## Multi-touch Operation

SpecMini is based on android. It support multi-touch operation. User can change reference level and center frequency with 1 finger and zoom the span with 2, just like a smart phone.

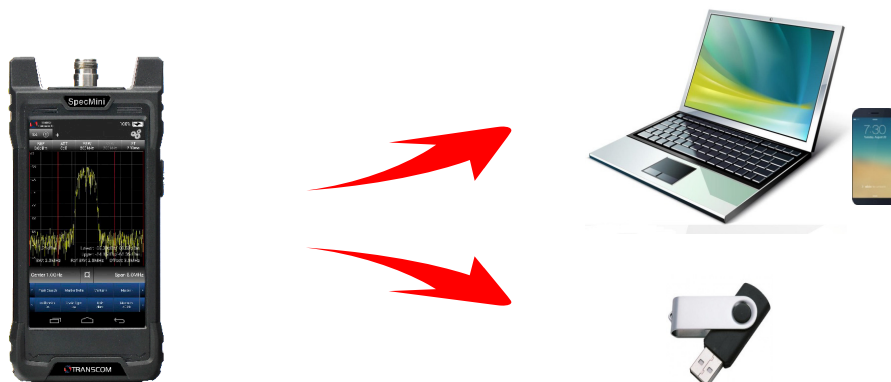

## Multi-task Measurement

SpecMini can simultaneously open 4 windows for measurement tasks with different setting.

## Data Store and Transfer

SpecMini provide 8G internal storage. It can save screenshot/data/setting and transfer them via USB/OTG/WiFi/Bluetooth, even upload to cloud storage.

### FM demodulation

This customized application support FM demodulation in relevant channel, and play and record FM content as evidence.

### Software customization

Transcom provides SpecMini-based software customizing services. Variety of application and software can be pre- installed or build in SpecMini as users demanded.

Transcom also proactively open the API of SpecMini and encourage distributors make your clients' requirements into customized features on SpecMini.

- GNSS interference Analysis

This customized application can analyze GNSS (GPS, Beidou) signal quality through CNR Loss and JNR. Spectrum function coordinating with the customized application makes traditional testing more convenient.

### Interference Signal Hunting with AoA Algorithm

With this powerful featured APP and optional high performance directional antenna. SpecMini can be used as a ultra compact interference signal locator (map service provided by "OpenStreetMap"). Steps are as follow:

1. User perform a 360° test, lock the direction which he receive strongest interference and make a vector on digital map.
2. User drive to more test locations and repeat step 1. Finally we should get 3 to 5 vectors on map, which cross with each other and enclose a small area.
3. The estimate location of interference is in that small area. User drive in the small area and find the final location with tone signal indicator.

Sketch map

On-site photo

Software screenshot (with OpenStreetMap)

### Spectrum Monitoring

In the same WIFI environment, users can place SpecMini at any position to measure, through WIFI spectrum data will be projected to the computer for spectrum monitoring

### Terminal Wireless Control

When a special scene requires a covert test, the SpecMini can be connected to the Android operating system phone, and it can be placed in the hidden backpack to control and test the data display using the mobile phone.

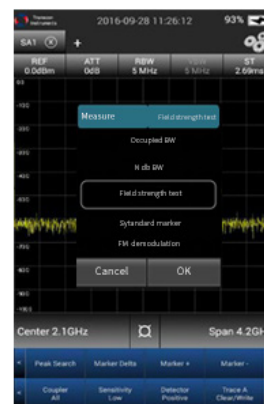

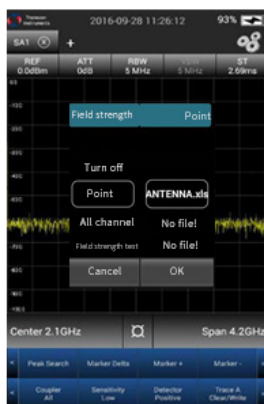

### General digital signal demodulation

Supports general digital demodulation, and outputs "vector", "constellation", "IQ waveform", "IQ eye", "spectral map" and "related value information table" of related general digital signals.

### Field strength test

SpecMini cooperates with near-field probe to measure point, full-channel, pointwhole-channel field strength.

# Control Elements

# Specifications

Key Functions	
Measurement	ACPR, CH Power, OBW, Phase Noise, and N dB Bandwidth
Trace	3 Trace: A, B and C Trace operation: Clear/Write, Maxhold, Minhold, Average, View ,Hide
Sweep	Continuous/single
Trigger	Free, Video (zero span)
Marker	8 maximum,surport 1 reference with 7 Delta Markers Peak Search, Marker Delta, Marker+, Marker-
Span	T8260: 0Hz, 100Hz to 6GHz Freq Slip, Span Zoom (1-2-5-10 series, 4GHz, 6GHz)
Scale	Log/Lin Log: 0.1 to 1, 0.1 step Lin: 1 to 10, 1 step
Unit	dBm, dBuV, dBV, W, mW, uW, pW, V, mV, uV
Sensitivity	Low, Medium and High
Detector	Positive, Negative, Sample, Average, RMS
Ref Level Offset	-50dB to 50dB
Multi-Screen	4 Maximum
Frequency	
Frequency Range	T8260: 9kHz to 6.0GHz
Frequency Reference	Aging Rate: ±1ppm
Frequency Readout Accuracy	±( (Readout Frequency + 1GHz) x Frequency Reference + Frequency Span Accuracy x Span)
Frequency Span Accuracy	± 1%
Sweep Time	1.2ms to 1600s 2.69ms to 1600s, zero span

Resolution Bandwidth	
RBW Range	10Hz to 5MHz (1-2-3-5-10 Series)
RBW Accuracy	RBW ≥ 1MHz, ±10% RBW < 1MHz, ±2%
Rectangular coefficient	RBW=5MHz, < 1: 4      RBW=1MHz, < 1: 4 RBW=100kHz, < 1: 4      RBW=300Hz, < 1: 4
Amplitude	
Measuring Range	Display average noise level to +20dBm
Input Attenuator Range	0 to 30dB, 1dB Step
Maximum Safe Input Level	Sensitivity(Low): +30dBm Sensitivity(Medium): 0dBm Sensitivity(High): -20dBm
Reference Level Range	-140dBm to +20dBm -440dBm to +220dBm (Ref level offset: ON)
Amplitude Accuracy	ATT set to 0 dB, input signal: -5 to -30 dBm; detector set to Positive, Sensitivity set to Low; RBW auto-coupled, all other settings auto-coupled, 23±5°C ±1.5dB
RBW Switching Uncertainty	±0.3dB
Input Attenuator Uncertainty	±0.6dB
Accuracy of Reference Level	Reference level: ≥ -60dBm, ±0.8dB
Display Average Noise Level (DANL)	T8260: Input Terminated, Detector set to Positive, Trace Average set to 1000, Span set to 50kHz, Ref set to -100dBm, all other settings auto-coupled, 23±5°C. Normalized to 1 Hz RBW  5MHz center frequency:                      1GHz center frequency: Sensitivity: Low                                      Sensitivity Low: -129dBm/Hz (typically -131dBm/Hz)                      -131dBm/Hz (typically -133dBm/Hz) Sensitivity: Medium                                      Sensitivity Medium: -129dBm/Hz (typically -131dBm/Hz)                      -149dBm/Hz (typically -151dBm/Hz) Sensitivity: High                                      Sensitivity High: -149dBm/Hz (typically -150dBm/Hz)                      -166dBm/Hz (typically -168dBm/Hz)
Residual Response	<-70dBm
Input-related Response	9kHz ~ 700MHz, <-70dBc      700MHz ~ 900MHz, <-46dBc 900MHz ~ 1.3GHz, <-42dBc      1.3GHz ~ 2.2GHz, <-46dBc 2.2GHz ~ 2.7GHz, <-53dBc      2.7GHz ~ 2.9GHz, <-42dBc 2.9GHz ~ 3.3GHz, <-38dBc      3.3GHz ~ 6GHz, <-53dBc
Second Harmonic Distortion	-70dBc (Input frequency 1.5GHz, Amplitude -10dBm)
Third-order Intercept (TOI)	-10dBm tones, 1MHz apart, Sensitivity set to low, Ref set to -10 dBm +15dBm
P1dB	+5dBm (nominal)
Phase Noise @1GHz	T8260: -95dBc/Hz, @10kHz (typically -97dBc/Hz) -123dBc/Hz, @1MHz (typically -125dBc/Hz)

General	
System settings	Preset, Save, ScreenCopy, Print, Language, Service, About
Connectors	RF input: N-type, female, 50Ω USB: USB type C Power interface: Slim-Tip, DC 12V/4.5A
Display	5.5-inch, 720p
Operating System	Android
Battery	Type: Lithium-ion Operation time: 4 hours Charging time: 6 hours Charging temperature: 0°C to +35°C, Must be in power of state
Operating environment	Operating temperature: 0°C to 50°C Storage temperature: -20°C to 70°C
Dimension	197mm*93mm*61mm(7.7*3.7*2.4in)
Weight	0.9kg

**Technical specifications**

This technical specifications include the influence of probability distribution, measurement uncertainty and environmental factors on the instrument performance. It guarantee the performance under the following conditions.

- The instrument is ON and warmed up for 30min.
  - The instrument internal reference signal is applied.
- Testing temperature is 23±5 °C, unless other specific condition applied.

**Typical value**

Additional description does not cover all performance information of the product guarantee. Unless otherwise specified, the typical value refers to the indicator or technical specification with which more than 80% of products comply under 23 ± 5 °C. The measurement uncertainty is excluded. SpecMini should be within the calibration period.

**Nominal value**

The nominal value refers to the characteristic description or design range. It is not tested or covered by the product. SpecMini should be within the calibration period.

# Ordering List

Model		Description
T8260		SpecMini handheld spectrum analyzer (9kHz to 6GHz)
Accessories Model		Description
SPM-AS001		Power adapter (20V/4.5A output)
SPM-AS002-I		Power cable(China standard)
SPM-AS002-B		Power cable(US standard)
SPM-AS002-G		Power cable(UK standard)
SPM-AS002-F		Power cable(EU standard)
SPM-AS004		USB data cable
SPM-AS005		USB OTG cable
SPM-AS006		Capacitive pen
SPM-AS007		Portable box
SPM-AS018		Portable soft bag
SPM-AS019		USB disk
SPM-S003		FM demodulation
SPM-S005		Waterfall display
Options		
SPM-S006		AoA locate
Replacement options		
SPM-AS021		Replacement battery
Antenna Options		
SPM-AS010		700MHz-2700MHz Omnidirectional Antenna (SMA-Male) w/ SPM-AS013 N-SMA adapter
SPM-AS011		700MHz-6000MHz Omnidirectional Antenna (SMA-Male) w/ SPM-AS013 N-SMA adapter
SPM-AS012		700MHz-4000MHz Directional Antenna (SMA-Female) w/ N-SMA adapter

Antenna Options

<p>SPM-AS100</p>		<p>700MHz-6000MHz Directional Antenna (SMA-Female) w/ N-SMA adapter</p>
<p>SPM-AS014</p>		<p>SMA-SMA RF Cable</p>
<p>SPM-AS015</p>		<p>N-N RF Cable</p>
<p>SPM-AS016</p>		<p>10MHz-700MHz Omnidirectional Antenna (Pitman Style, N-Male)</p>
<p>SPM-AS040</p>		<p>Antenna carrying case (For SPM-AS042 ~ SPM-AS045)</p>
<p>SPM-AS041</p>		<p>Pistol grab handle (For SPM-AS042 ~ SPM-AS045)</p>
<p>SPM-AS042</p>		<p>9KHz-20MHz Directional Antenna (N-Female)</p>
<p>SPM-AS043</p>		<p>20MHz-200MHz Directional Antenna (N-Female)</p>
<p>SPM-AS044</p>		<p>200MHz-500MHz Directional Antenna (N-Female)</p>
<p>SPM-AS045</p>		<p>500MHz-3000MHz Directional Antenna (N-Female)</p>

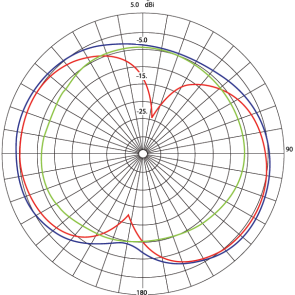

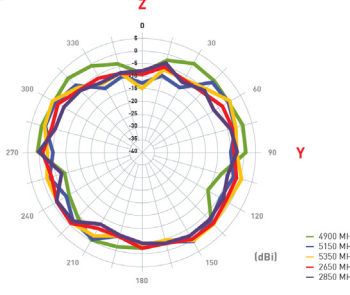

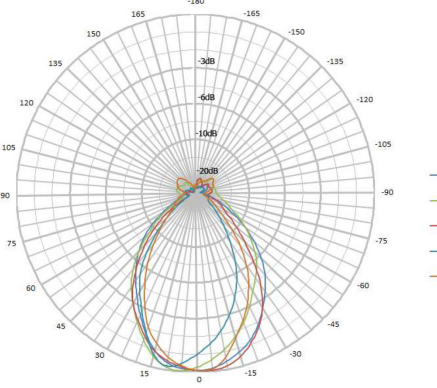

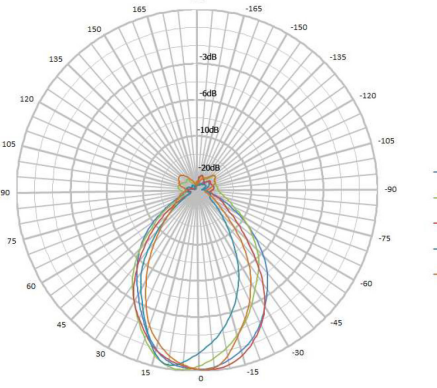

SPM-AS101		Plastic Rack. Align the direction of antenna and SpecMini to the same. Provide a better one-hand device holding experience
-----------	---	--

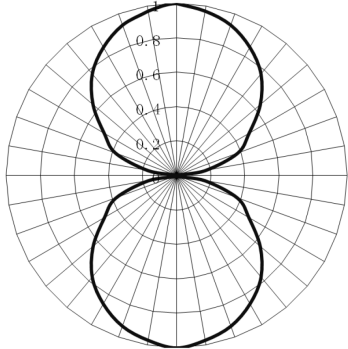

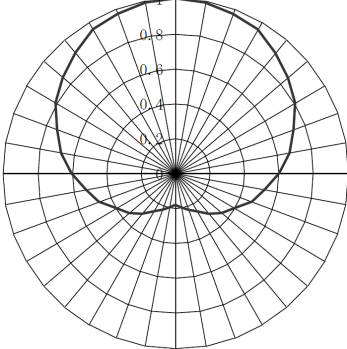

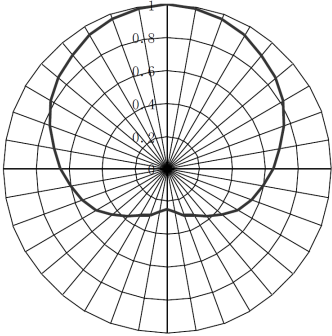

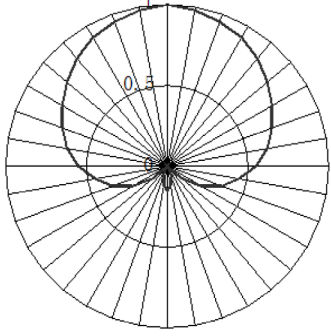

**Antenna Specification**

Antenna specification please refers to appendix.

**Pistol Type Antenna**

Antenna AS042 to AS045 should be ordered with AS040 antenna carrying case and AS041 pistol grab handle.
